Hi Beth, thanks so much for the email and the information below. It would be great to talk with you sometime early next week. Are you free Monday afternoon?

Dru told me she talked with you and Kurt in late June about the Washington hydro permits. FYI that since then, our administration has issued a directive that we issue 59 new permits in Region 10 by November 30, 2018 and have them effective by December 31, 2018. The 4 lower Columbia dams are part of the 59 permits, which I'm working on.

**Ex. 6 Personal Privacy (PP)** Needless to say, that gives EPA a very short turnaround time. Because of some new administrative steps required for general permits, it will be quicker for us to issue these permits as individual permits. We anticipate the individual permits for these projects to be very similar to EPA's draft Idaho GP for hydroelectric facilities that was recently out for public comment. Because the discharges from the Bonneville, John Day, and McNary dams are in both Washington and Oregon, and we'll be writing limits for outfalls discharging to the Washington side, I wanted to make sure that the permit is consistent with the Oregon permit. I know Dru has already worked with ODEQ on making sure the draft Idaho GP was consistent with the Oregon permit requirements, but still thought it would be good to coordinate with you and let you know what we were doing. Of course, if you have some thoughts and ideas on other things we should include in the permit, I'm very interested in hearing them.

Feel free to give me a call today or tomorrow morning if you have any questions. Otherwise, I hope we can do a quick call next week. Thanks! – Jenny Wu, 206-553-6328

**Subject:** FW: OR permits on Bonneville and John Day dams

Jenny,

Hi. I am just getting back to you so that you know I received your email.

Bonneville permit and permit evaluation report for this permit available using the links below.

<http://ormswd2.synergycs.com/HPRMWebDrawer/RecordView/5297894>

<http://ormswd2.synergycs.com/HPRMWebDrawer/RecordView/5303200>

DEQ recently switched to a common document repository system, so if these links don't work for you please let me know. I am going to see about getting info on John Day next.

I would like to know about the project and timeline. We can talk at some point. Thanks.

**Subject:** OR permits on Bonneville and John Day dams

Hi Beth,

I'm Jenny Wu, the new EPA permit writer for Washington dam permits on the Columbia River. Dru Keenan gave me your name to talk to on the Bonneville and John Day dams, since DEQ has issued permits for outfalls discharging from those dams to the Oregon side. As I work on the permits, I wanted to make sure I consider the Oregon dam permit requirements when I write permit limits.

Would you have time to talk sometime? Also, can you send me links or attachments to the documents? Thanks. And if you have any questions about what I'm working on and our timeline, I'd be happy to let you know.

Thanks!
